Training Exams

Our Toolbox Talk app allows trainers to conduct safety talks and have employee sign off as proof of attendance.

This works great when you have multiple employees at a worksite and someone, such as a foreman or supervisor, is onsite to conduct the training. However, many of our customers have what we call "lone" workers (i.e. service technicians, truck drivers, etc.) who aren't always available for in-person training.

With this new feature, you can create test questions for your toolbox talks and send them via email to your employees. They open the email, read the toolbox talk and answer the questions. Once they answer all questions correctly, they hit submit and the training is documented.

You'll find this new feature to be customizable, simple to use and affordable!

Simple Solutions

Did you know Safety Reports has our own team of in-house app developers? They specialize in building simple, yet powerful apps for your business needs!

They're supported by a Certified Safety Professional and what we think is the best sales and support team in the industry!

Don't take our word for it, sign up for a free trial or schedule a demo and see for yourself!

Our products include:

[Inspection App](#)

[Training App](#)

[JSA App](#)

[Observation App](#)

[PrecipAlert App](#)

We'll be releasing an **Incident App** later this Fall and adding bar code scanning as a new feature to our inspection app. Stay tuned!

Incident App

Our new Incident App is still in development and we expect it to be released later this Fall. This app will allow you to document OSHA recordables, near misses and more! Stay tuned for more information and updates!

Parking Lot Report

We recently had some work done to our parking lot here at Safety Reports to repair damaged concrete from this past winter.

The crews finished pouring the east entrance and then went on to work on the west entrance.

Looking out our office window, we noticed they apparently forgot to set up barricades. Not good.

It was just a matter of time before someone drove through the freshly poured concrete. So, our resourceful staff at Safety Reports took it upon themselves to fix the problem before it became a "real" problem.

So, we decided to have fun with it and used our Inspection App to document our findings and thankfully, disaster was avoided!

California, Here We Come!

We'll be packing up and heading to San Diego in a few weeks for the NSC 2019 Congress and Expo to promote our apps.

If you're planning to be at the show (Sep. 9-11), please stop by and visit us at **Booth 1247**. We'd love to meet you in person!

Interested in a floor pass for the show? [Click here to download your free 3-day floor pass \(\\$224 value\).](#)

Photo of the Month

Must be using a safety net for fall protection, right?

Note: this photo was not taken using our app. We NEVER post/use customer photos without obtaining written consent. Source: [pinterest.com/source/asse.org](https://www.pinterest.com/source/asse.org)

Safety Conferences

If you want to meet us in person and learn more about our apps, we encourage you to attend the safety conferences where we are exhibiting!

Be sure to ask us about free single-day floor passes.
