Virtual Safety Reports (VSR)

Just like the name implies, with **Virtual Safety Reports (VSR)** you can inspect multiple worksites that are miles apart, without ever leaving your office. It's the perfect solution in this time of social distancing and travel restrictions.

Connect in real-time, go paperless, and save resources with [Virtual Safety Reports \(VSR\)](#).

The best part is that it's **FREE** to our existing subscribers! You get up to 10 each 1-hour sessions per month per license with your Enterprise subscription!

If you're not a current customer, you can [Subscribe](#) for just \$70/mo and start using this technology today, or [Schedule a Demo](#) to see how easy it is to use!

Training Survey

Safety+Health released the results of their 2020 Training Survey. The survey was conducted in March, just as the COVID-19 pandemic was taking a major hold in the United States. [View Survey](#)

What has Safety Reports done to help improve training in response to COVID-19?

Our Toolbox Talk App allows the instructor to **verify attendance by taking a photo** of attendees, rather than have them use their finger to sign the tablet. The photo is embedded in training report.

We have also added a remote training option that allows the instructor to **email students a toolbox talk with built in exam questions**. The recipient just needs to open the toolbox talk and when they answer all the questions correctly, they get credit for completing the training. Again, just another subtle change designed for convenience and to reduce exposure to COVID-19.

Safety Reports is also working to add an option for employers to assign a bar code or QR code to employees, where the **instructor scans the code as employees arrive for training**, reducing exposure created by signing a traditional paper roster. [More Info](#)

Inspection Survey

Has the pandemic impacted your ability to conduct inspections? If so, we'd like to know to what extent. [Take Survey](#)

Workplace Standards for COVID-19

Did you know that emergency COVID regulations for Virginia workplaces are set to take effect the week of July 27th?

Virginia has become the first state to pass regulations, but it's likely that other states will follow suit.

In summary, these newly adopted standards require all employers, at a minimum, to mandate social distancing measures and face coverings for employees in customer-facing positions and when social distancing is not possible, provide frequent access to hand washing or hand sanitizer, and regularly clean high-contact surfaces.

In addition, new standards require all employees be notified within 24 hours if a coworker tests positive for the virus. Employees who are known or suspected to be positive for COVID-19 cannot return to work for 10 days or until they receive two consecutive negative tests. [More Info](#)

Fighting COVID-19

Safety Reports is fighting mad about COVID-19. Here are just a few steps we're taking to combat this virus:

1. Conducting daily [COVID self-Assessments](#) using **SR Scan App**
2. Wearing masks when social distancing is not possible
3. Taped off 6-foot COVID awareness zones at workspaces
