

OSHA enforcement activity is on the rise and so are penalties for non-compliance. Following are just a few examples:

California fines contractor after worker seriously injured in fall California OSHA issued four citations and \$75,750 in penalties to Accurate Comfort Systems Inc. after a worker suffered serious injuries in a fall from a 12-foot-high work area. [READ MORE...](#)

Georgia contractor cited for trenching violations Corley Contractors Inc. faces \$106,078 in penalties for exposing workers to excavation hazards while installing water and sewer lines. [READ MORE...](#)

Michigan cites powder coating company for exposing workers to fall and other hazards Michigan OSHA issued seven citations and \$65,000 in penalties to Powder Cote II for failing to provide fall protection of guardrail systems, guard rotating shafts and machinery, and failing to control the startup of machinery during maintenance. [READ MORE...](#)

Wisconsin Pallet Manufacturer Cited Three Workers Exposed to Hazardous Wood Dust OSHA has cited AVID Pallet Services, LLC, after a follow up inspection found workers continued to be exposed to wood dust. [READ MORE...](#)

New York Plant Cited after Workers Suffers Amputation OSHA cited Remington Arms Co., LLC, for unguarded machinery violations after a workers fingertip was amputated while using a metal working machine. [READ MORE...](#)

Florida Roofing Contractor Cited for Exposing Workers to Fall Hazards OSHA cited Florida Roofing Experts, Inc., after inspectors observed workers performing residential roofing activities without fall protection. [READ MORE...](#)

Training Tracking

Did you know for as little as \$50 per year you can track training using the Safety Reports Training Tracking System?

Training Tracking allows you to enter virtually any training topic and if it's "reoccurring training" you can set reminders to be sure to schedule refresher training when it comes due.

We're also adding a new feature in May that allows you to identify training requirements per job title and track individual employees to ensure they meet all minimum training requirements.

If you'd like to learn more about our "Training Tracking" feature, please [contact us](#).

Precip Alert App

With the Spring rains upon us, what better time than now to take a look at our [PrecipAlert](#) App.

This app allows you to track predicted and actual rainfall for a specific worksite.

There are multiple advantages to using this app: 1) our rainfall reports can be used as evidence when trying to explain weather-related project delays, 2) knowing in advance when heavy rainfall is predicted can help better utilize resources, no sending crews to a roofing project or remote worksite if rainfall prevents crews from working, and 3) meet important environmental regulations specific to rainwater run-off and soil erosion.

Features include:

- Daily email reports
- Precise GPS locations
- Rainfall alert customization
- Precipitation history reports
